MEAT

BRAND GUIDE

Version 1.0 / October 2026

Proposed app identity / v1.0

about the brand

MEAT is a standalone product brand identified in the fleshsesh brand architecture. This edition proposes its visual identity and app presence.

A strong uppercase wordmark, compact M and confident coral palette give the name a recognisable starting point. The guide keeps product language neutral until its feature set and proposition are defined.

unmistakable

A short name with a strong, compact silhouette.

direct

Simple hierarchy and language that is easy to act on.

adaptable

An identity designed for the app, its launch and future communication.

NAMING

MEAT is always uppercase. Use MEAT app when the descriptor helps; app remains lowercase. Do not expand MEAT into an invented acronym.

the wordmark

Proposed visual system. Established name retained.

This proposed master uses uppercase Montserrat Black with compact spacing. All four letters form one unit. Use the supplied outlines rather than rebuilding the mark by eye.

The coral version is the signature expression. White and black are the functional alternatives. The proposal introduces the identity only; it does not define or promise app features.

logo versions

Primary / signature expression

Flat white / on dark

Flat black / on light

Compact mark / app and avatar

clear space and size

Equal x on every side

Keep clear space equal to half the capital M-height around the wordmark. For app tiles, preserve the central safe zone shown in the supplied exports.

MINIMUM SIZE

Wordmark: 88 px wide on screen or 23 mm in print. Switch to the M below this size. The icon minimum is 16 px; a full-name text label should accompany unfamiliar contexts.

SCREEN REFERENCE

MEAT

88 px

32 / 16 px

please don't

Stretch or squash

Rotate the master

Use unauthorised colours

Lose foreground contrast

Substitute the lettering

Crowd the clear space

colour

This is a proposed palette created for this edition. Keep coral purposeful and the interface calm. It should signal identity without carrying every piece of information.

Ink

#10090C

RGB 16 / 9 / 12

CMYK 0 / 44 / 25 / 94

Primary ground

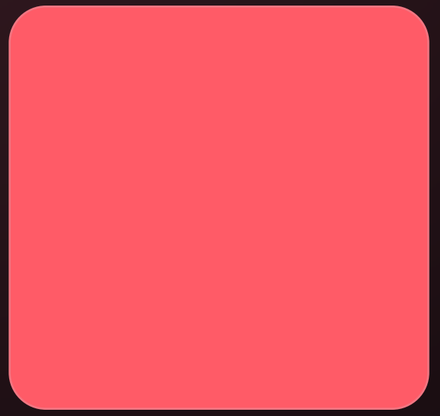

Merlot

#26151C

RGB 38 / 21 / 28

CMYK 0 / 45 / 26 / 85

Panels and depth

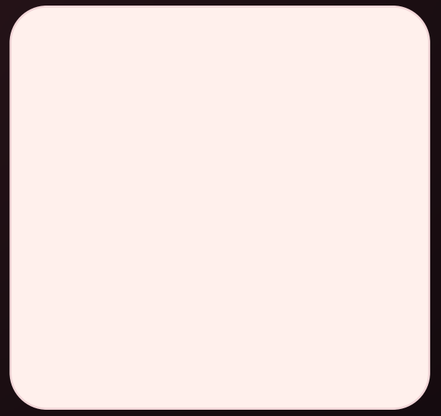

Coral

#FF5B67

RGB 255 / 91 / 103

CMYK 0 / 64 / 60 / 0

Signature accent

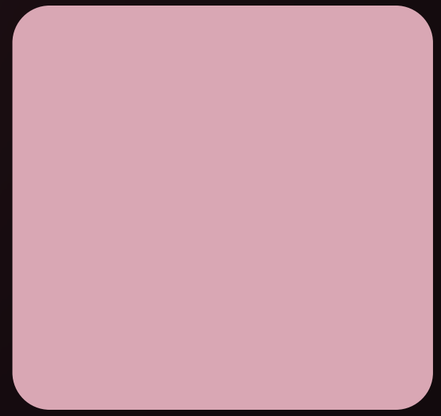

Cream

#FFF0EC

RGB 255 / 240 / 236

CMYK 0 / 6 / 7 / 0

Wordmark and primary text

Rose

#D9A7B4

RGB 217 / 167 / 180

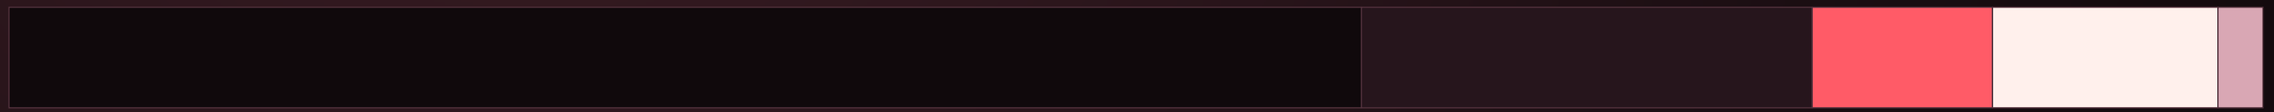

CMYK 0 / 23 / 17 / 15

Supporting text on dark

sRGB values are authoritative. CMYK values are approximate conversions; proof with the print supplier.

using colour

ILLUSTRATIVE BALANCE / ADAPT TO THE SURFACE

60% 20% 8% 10% 2%

TEXT CONTRAST / SOLID COLOUR PAIRS

Aa Cream on Ink

17.75:1 / AAA

Aa Cream on Merlot

15.69:1 / AAA

Aa Coral on Ink

6.51:1 / AA

Aa Rose on Ink

9.51:1 / AAA

Aa Ink on Cream

17.75:1 / AAA

Aa Ink on Coral

6.51:1 / AA

Normal text: AA 4.5:1; AAA 7:1. Large text uses lower thresholds. These ratios assess solid token pairs only; gradients, imagery and complete interfaces need their own checks.

Reference: WCAG 2.2 / 1.4.3 Contrast (Minimum) and 1.4.6 Contrast (Enhanced)

typography

Proposed pairing: Montserrat for a strong visual signature and Inter for functional, readable interface copy.

DISPLAY

MAKE IT YOURS.

Montserrat Black / wordmark and short display lines

HEADING

Your next move.

Inter Bold / interface headings

BODY

Choose your settings and review them whenever you need.

Inter Regular / 17 px with 26 px leading

CAPTION

Your settings have been saved.

Inter Medium / 12 px with 18 px leading

icon system

The M is the proposed compact identifier. Keep its shape consistent across app tiles, avatars and favicons.

Dark tile

Light tile

Circular avatar

Single-colour glyph

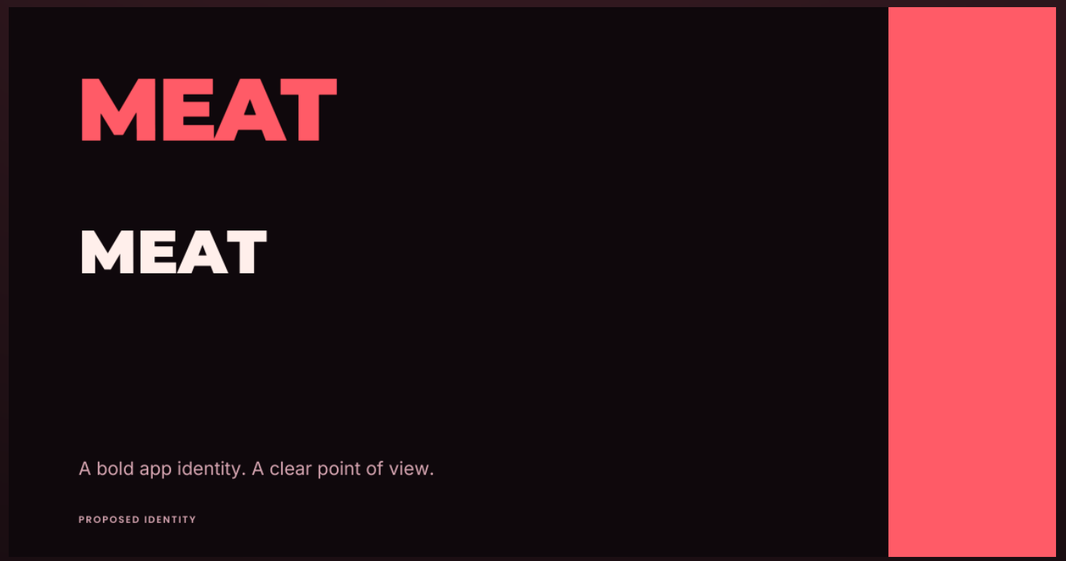

ACTUAL SIZES

64 48 32 24 16

Use the simple mark at small sizes. Product icons and feature symbols should be defined once the app scope is known.

social and digital

Open Graph image / 1200 x 630

Keep the identity inside the safe area and check how each platform crops the image. The supplied files are reusable starting points.

Profile header / 1500 x 500

Avatars / circular and square

voice and tone

A practical voice for the brand. Apply it consistently across every touchpoint.

direct

Use short, concrete words. Make the next action understandable.

self-assured

Let the identity do the work. Avoid exaggerated promises and forced bravado.

respectful

Give people clear choices. Describe only features the product actually provides.

IN PRACTICE

Do	Make it yours.
Do	Your settings have been saved.
Don't	Invented matching, privacy or safety promises.
Don't	An acronym or tagline presented as established fact.

the logo kit

The companion kit contains the assets illustrated in this guide, plus practical production files.

logos/svg + logos/png	Outlined SVG masters and transparent PNG wordmarks at 512, 1024 and 2048 px.
icons/svg + icons/png	Compact glyphs, dark and light tiles; practical sizes from 16 to 1024 px.
icons/web	Favicon, Apple touch icon, maskable icon, manifest and a relative-path head snippet.
social	Open Graph, profile header, square artwork and circular / square avatars.
guide + tokens + shared fonts	This PDF, sRGB CSS and JSON tokens, open-source font files and their licences.

PROPOSED IDENTITY: the name MEAT is established, but no existing logo, colour system or product brief was supplied or resolved. All visual standards here are new.

Identity basis: MEAT naming and separate-product reference in the supplied fleshsesh brand guide.
